- GRADUATED WORKSTREAMS
H.E. Joe Biden, President, United States
“We will closely align our efforts with the work of forums like the CEM and the MI—both of which I am proud to say the United States will chair next year.”

H.E. Kadri Simson, Commissioner for Energy, European Commission, European Union
“I welcome the decision to extend the mandate and raise the ambition of the CEM. I was pleased to take part in the launch of the Global Hydrogen Ports Coalition and to join and lead together with Canada and the US a new Initiative on Empowering People. These and other CEM workstreams will make a difference in this decade. We must all use the next more ambitious phase of CEM for turning our goals into real action and tangible results.”

H.E. Wang Zhigang, Minister of Science and Technology, China
“We will deepen cooperation and exchanges with other CEM members in the fields of new energy vehicles, smart grids, hydrogen, etc. and draw on best practices to jointly promote global clean energy development and build a cleaner, better planet.”

H.E. Dr Fatih Birol, Executive Director, International Energy Agency
“The IEA is proud to both host and be a key partner of the CEM. The CEM is a proven and popular forum for important practical work that accelerates our clean energy adoption and we work closely together to build impactful global coalitions of countries companies and our international experts to accelerate clean energy transitions around the world.”

H.E. Alok Kumar, Secretary, Ministry of Power, India
“Our association with CEM has been very old. We have been CEM’s founding member and we intend to strengthen the CEM furthermore. I am also pleased to announce that we will be hosting the CEM14 in India.”

H.E. Anne-Marie Trevelyan, Former Minister for Business, Energy and Clean Growth, United Kingdom
“The CEM has long been a champion of the importance of sectors for the energy transition. That is why we launched the IDDI Initiative with India to help create markets for green industrial goods. I am also pleased to announce that the UK will become a full member of the CEM’s Hydrogen Initiative.”

HRH Prince Abdulaziz bin Salman Al Saud, Minister of Energy, Saudi Arabia
“We have the most critical players in the green energy field gathered around the virtual table. This represents what the CEM is all about. We are a committed community of governments, international organizations, private sector players coming together to make a difference. We believe that the CEM is an essential platform for international collaboration.”

H.E. Teresa Ribera Rodríguez, Deputy Prime Minister and Minister of Ecological Transition, Spain
“This is a very important initiative that works on how far and fast we can improve our cooperation, the learning processes, and how we can achieve this very important goal with all its challenges.”

H.E. Dr Fatih Birol, Executive Director, International Energy Agency
“The IEA is proud to both host and be a key partner of the CEM. The CEM is a proven and popular forum for important practical work that accelerates our clean energy adoption and we work closely together to build impactful global coalitions of countries companies and our international experts to accelerate clean energy transitions around the world.”
CLEAN ENERGY MINISTERIAL (CEM)
THE CEM MISSION

The world is undertaking the fastest and most far-reaching energy transition in history.

The CEM brings together a powerful COMMUNITY of the world’s largest and leading countries, companies, and international experts to achieve one mission – ACCELERATE CLEAN ENERGY TRANSITIONS.

CEM members have agreed that it should work to supercharge three crucial shifts this decade:

**Scale**
Clean energy adoption this decade must far outpace the last, moving from niche- to mass- to massive-scale deployment.

**Sectors**
Clean energy action must grow from the power sector to every sector, and from energy ministries to every ministry.

**Society**
An inclusive, whole-of-society approach must look from governments and companies to consumers and citizens.
THE CEM VALUE PROPOSITION

GLOBAL LEADERSHIP
CEM Members represent 90% of installed RE power generation capacity, 80% of global RE investments & the majority of public R&D.

SINGLE MISSION
Accelerate clean energy transitions around the world.

FLEXIBLE APPROACH
Members can form or join clean energy workstreams in line with their priorities.

OPEN PLATFORM
Many leading international organisations, companies, think tanks, foundations.

ACTION COALITIONS
Activities are in a state of constant renewal, with action coalitions coming together to design and deliver new workstreams.

CEM COMMUNITY
The CEM community consists of the world’s best international organisations and most influential actors.
HOW DOES THE CEM WORK?

The CEM builds global action coalitions to achieve clean energy goals and advance their transitions. The CEM operates through three key pillars:

- **CEM Ministerial**: An annual meeting of its ministers, partners and community.
- **CEM Work Programme**: A combination of international campaigns and initiatives spanning the clean energy spectrum.
- **CEM Secretariat**: A small, flexible team that serves the ministerial, all workstreams and members.
NEXT MINISTERIAL MEETING

• **6-8 Apr 2022** - CEM13 Preparatory Meeting will take place in New Delhi, India.
• **21-23 Sep 2022** - CEM13-MI7 will take place in Pittsburgh, Pennsylvania, US.

CEM MINISTERIAL
### United States
- Launch of 11 initiatives under three themes:
  - Clean Energy Supply – Carbon Capture, Use and Storage, Solar and Wind, Hydropower, Bioenergy
  - Clean Energy Access – Off-Grid Appliances, Women in Energy

### United Arab Emirates
- Publication of CCUS Action Group Recommendations
- Forum on women’s contribution to clean energy
- High-Level Public-Private Roundtables on:
  - Renewable Energy Scale-Up
  - Sustainable Cities
  - Technologies and Business Models for Energy Efficiency
  - Utility-Scale Energy Efficiency

### United Kingdom
- Launch of Solar and Wind Resource Atlas
- Launch collaboration with Sustainable Energy for All (SE4All)

### India
- High-Level Public-Private Roundtables on solar PV, clean vehicle adoption, power systems in emerging economies, renewables policy and finance, energy management systems, and mini-grid development
- Innovation showcase pavilion with 40+ industry booths
- 1st SEAD Global Efficiency Medal Competition for energy-efficient flat-panel televisions

### Korea
- 1st Global LEAP Appliance Awards
- 1st ISGAN Award of Excellence
- SEAD’s Global Efficiency Medal for energy-efficient computer monitors
- High-level dialogues on clean energy finance
- Model CEM program with university students represent delegates from member governments
- ISGAN Award of Excellence for “Grid4EU”
- Launch of CEM 2.0 – the CEM’s 2nd phase

### Mexico
- Launch of Global Lighting Challenge
- Launch of Power System Challenge
- Evolution of the Clean Energy Solutions Center
- SEAD Global Efficiency Medal Award
- ISGAN Award of Excellence for “Grid4EU”
- Launch of CEM 2.0 – the CEM’s 2nd phase

**CEM MINISTERIAL 2016-2021**
CEM WORKSTREAMS

INITIATIVE

- Convene a **Coalition to collaborate and accelerate** clean energy deployment.
- Focuses on **Coalition, Collaboration, Change, Communication**.
- Consists of Member leads (2-3), Coordinator, and CEM Secretariat.
- Engages with the **right Coalition** to best serve the goals.
- Last **3+ years**.
- **Success Metrics**: Engagement/Activity metrics (active coalition participation.); Delivery metrics (delivery of work programme outputs to time, cost, quality); Output and Outcome metrics (expert meetings, analytical reports, project collaborations, regulatory alignment/coherence).

CAMPAIGN

- Inspire **Global Action** towards a **specific ambitious clean energy goal**.
- Focuses on **Communication, Community, Commitments**.
- Consists of Member leads, Campaign Manager, and CEM Secretariat.
- Engages with a **broad audience** and seeks to grow a **powerful community** that can generate impactful commitments.
- Lasts **1-2 years**.
- **Success Metrics**: Awareness metrics (events, viewers, participants); Engagement metrics (followers, subscribers, amplification); Impact metrics (signatories and commitments).
Example: CEM Transport Activities

**ACTORS**

**ACTIONS**

**OUTCOMES**

- Government Fleet Declaration
- EV Pilot City Programme and Forum
- EVI Call to Action on Closing the Gap
- COP26 Global MoU on Zero Emission Trucks
- Support the GEF7 Global E-Mobility Programme
- Global EV sales are taking off...

---

**Global EV Outlook 2021**

**Global EV Data Explorer**

**Electric Vehicles Initiative**

**Global Commercial Vehicle Drive to Zero**
CEM SECRETARIAT

A small, flexible team whose key functions include:

• Support the delivery of Ministerial Meetings, CEM Initiatives and Campaigns, partnerships and engagement.
• Coordinate CEM work and connect the strategic direction.
• Respond to the priorities of Members.
• Facilitate CEM Steering Committee and sub-group meetings.
• Manage communications and disseminate CEM insights.
• Manage governance and funding mechanisms.

Website: www.cleanenergyministerial.org
Email: Secretariat@CEMSecretariat.org
H.E. Seamus O’Regan, Minister of Natural Resources, Canada
"The world needs to get to net-zero. There is no other option. Bold action, international collaboration and energy innovation will get us there. As a valued member of the CEM and Mission Innovation communities, Canada is leading global efforts to build a low-emissions energy future that is prosperous, creates jobs and leaves no one behind."

H.E. Francesco La Camera, Director General, International Renewable Energy Agency
"IRENA is the operating agent of the CEM’s Long-Term Energy Scenario Campaign, working with the co-leads Denmark and Germany. We are leveraging our global membership to create a network of experts to tackle the challenges of the 1.5 degree pathway ahead of us."

H.E. Jennifer Granholm, Secretary of Energy, United States
“We believe CEM 3.0 is going to be this forum’s most consequential era because not only are we working together to drive innovation forward, we are endeavouring to make this clean energy transition an inclusive one which benefits all communities."

H.E. Bento Albuquerque, Minister of State for Mines and Energy, Brazil
"Even though another year goes by without us meeting face to face, we, the CEM ministers and heads of observer organizations, come together to demonstrate global clean energy leadership, announce new clean energy actions and commitment, raise collective ambition and shape the future direction of the CEM."

H.E. Dan Jørgensen, Minister of Climate, Energy and Utilities, Denmark
“Denmark wishes to confirm its strong commitment to the CEM. We welcome the increased level of ambition of the next phase."

H.E. Anders Ygeman, Minister for Energy and Digital Development, Sweden
“Sweden remains fully committed to CEM3.0 and its mission to accelerate the clean energy transition. A year of ambition should turn into a decade of delivery.”

H.E. Joan MacNaughton, CB HonFEI (Lady Jeffrey), Chair, Climate Group
“Congratulations to CEM and the governments for the work they are doing on IDDI. The work of the CEM in actually providing the framework for companies to act is crucial.”

H.E. Juan Carlos Jobet, Minister of Energy, Chile
“It is an honour for Chile to host the 12th Clean Energy Ministerial. This is the key moment where we, the CEM ministers and heads of observer organizations, come together to demonstrate global clean energy leadership, announce new clean energy actions and commitment, raise collective ambition and shape the future direction of the CEM.”
CEM WORK PROGRAMME
MISSION
Advance power system transformation by facilitating collaborative research, information-sharing, and capacity-building among power system practitioners. Promote integrated policy, regulatory, financial, and technical solutions for the deployment of clean energy in combination with large-scale energy efficiency and smart grid deployment.

GOALS
The 21st Century Power Partnership conducts activities in four focus areas, which each represent an opportunity to achieve better global coordination along the path to clean, reliable, cost-effective energy systems:

- Develop and share knowledge on key topics related to the transformation of the electricity sector
- Strengthen and disseminate technical tools to accelerate the transition to a more modern electricity sector
- Bolster the capacity of experts needed to advance the policies, programs, and practices required to transition toward a clean and efficient power sector
- Apply the knowledge, tools, and capacity developed through this effort to improve national and subnational policies and regulations
MISSION
Build momentum among industry and governments to enhance power system flexibility through the coordinated deployment of advanced power plants, smart electricity grids, demand-side management, and storage.

GOALS
• Coordinate high-level policy forums that aim to deploy, harness and consolidate public-private momentum on strategies for system flexibility.
• Deepen understanding of available flexibility resources through deep-dive events and workshops on grids and storage; demand-side management and digitalisation; and power plants and future markets. These provide a platform for operational experts from industry, ministries, regulators, and utilities to exchange experiences and devise concrete actions. The findings are passed to policy-makers and wider audiences through policy briefs.
• Publish policy briefs that summarize deep dive events and maximise visibility throughout the campaign.

LEAD GOVERNMENTS
Brazil, Canada, Chile, Finland, Germany, India, Italy, Japan, Saudi Arabia, South Africa, United Arab Emirates

PARTICIPANTS

COORDINATOR

PSF CEM Website
MISSION
Foster new collaborations and assist policymakers in considering the roles that nuclear energy could play in their clean energy future. Understand available technology options, provide information on technical feasibility, economics, and financing, and share perspectives from those involved.

GOALS
• Bring nuclear energy from traditional, nuclear-only fora to broader multilateral discussions on clean energy at both the ministerial and working levels;
• Engage both nuclear and non-nuclear energy policy makers and stakeholders in a discussion on the role of nuclear energy in integrated clean energy systems of the future; and
• Ensure energy policy-makers are informed of the opportunities and challenges of the full range of options needed to meet global clean energy goals—covering areas of technology feasibility, economics and financing, and stakeholder perspectives.

LEAD GOVERNMENTS
Argentina, Brazil, France, Jordan, Kenya, Poland, Romania, Russia, United Arab Emirates, United Kingdom

PARTICIPANTS

PARTNERS
Contact: Secretariat@CEMSecretariat.org
MISSION
To provide an understanding of the economic benefits of advanced nuclear technologies to a wide spectrum of participating countries, including the qualitative and quantitative benefits of nuclear reactors with highly flexible power output.

GOALS
Model revenue opportunities for flexible nuclear power stations in various parts of the world and communicate the cost and technical performance requirements back to government stakeholders, as well as to design teams responsible for developing advanced generation IV reactors.

LEAD GOVERNMENTS
Argentina, France, Jordan, Kenya, Russia, United Arab Emirates, United Kingdom

MISSION
Accelerate the development and deployment of smarter electricity grids worldwide, enabling increased demand response and energy efficiency. It focuses on five principal areas: policy standards and regulation, finance and business models, technology system development, workforce skills and knowledge, user and consumer engagement.

GOALS
ISGAN is an international platform for the development and exchange of knowledge and expertise on smarter, cleaner, and more flexible and resilient electricity grids (“Smart Grids”). ISGAN provides an important channel for the communication of experience, trends, lessons learned, and visions in support of global, national and regional clean energy objectives as well as new flexible and resilient solutions for Smart Grids.

LEAD GOVERNMENTS
Australia, Brazil, Canada, China, Denmark, European Commission, Finland, France, Germany, Israel, Japan, Netherlands, Norway, Russia, South Africa, South Korea, Spain, Sweden, United Kingdom

COORDINATOR

Contact: Secretariat@CEMSecretariat.org
MISSION
Accelerate the regional electricity grid and power market integration in order to maximise the use of cost-efficient clean energy sources available at the country level and regionally. Facilitate the development of sustainable, secure, and affordable regional electricity systems while contributing to economic growth, climate change mitigation, and decarbonisation of energy systems.

GOALS
- Facilitate the transition of energy systems to more interconnected, and electrified modern energy systems, and maximise the use of renewable energy. Facilitate policy discussions on the regulatory and market frameworks for electricity system integration.
- Support the development of sustainable, secure and affordable regional electricity systems to contribute to climate change mitigation and decarbonisation of energy systems.
- Increase the understanding of policy and regulatory issues regarding regional electricity interconnection. Address concerns on the security and reliability of large-scale interconnection.

LEAD GOVERNMENTS
- Chile, Finland, South Africa, South Korea, United Arab Emirates

COORDINATOR
- China Southern Power Grid, ESKOM, Korea Electric Power Corporation (KEPCO), State Grid Corporation of China (SGCC)

PARTICIPANTS
- Chile, Finland, South Africa, South Korea, United Arab Emirates

PARTNERS
- China Southern Power Grid, ESKOM, Korea Electric Power Corporation (KEPCO), State Grid Corporation of China (SGCC)

RGEI CEM Website

Contact: Secretariat@CEMSecretariat.org
MISSION
Accelerate the global deployment of electric vehicles worldwide through analytical reports, policy recommendations, technical workshops and study tours, multilateral dialogues and technical assistance to regions or member countries.

GOALS
• Strengthen the understanding of the opportunities offered by electric mobility to meet multiple policy goals.
• Improve awareness of the drivers of EV deployment, supporting country-level policy and regulatory implementation.
• Outline a vision for the future of electric mobility, building consensus on policy goals (e.g. EV30@30) and benchmarking success.
• Bolster policy action and improve the visibility of national policy efforts in publications, such as the Global EV Outlook
• Mobilize targeted policy action and strengthening the impact of specific measures.
• Accelerate the geographical coverage of policy deployment on electric mobility through capacity building and sharing knowledge and experiences, accelerating learning, and specific activities such as the EVI Global Pilot Cities Program.

LEAD GOVERNMENTS
Canada, China
COORDINATOR
IEA

PARTICIPANTS
Chile, Finland, France, Germany, India, Japan, Netherlands, New Zealand, Norway, Poland, Portugal, Sweden, UK, US

PARTNERS

Contact: Secretariat@CEMSecretariat.org
**MISSION**

Raise ambition, build awareness, and garner commitments on electric vehicle deployment from member countries and public and private participants. Member countries pledge to increase their share of EVs to 30% by 2030, thereby promoting innovation, economic and industrial development, energy security, and reduction of local air pollution.

**GOALS**

- Lower GHG emissions and help to achieve climate goals by driving the global EV agenda.
- Reduce air pollution, especially in urban areas. Air pollution is a major public health issue in cities via efforts such as the EVI Global Pilot City Programme.
- Increase energy efficiency: an electric powertrain uses significantly less energy per kilometre travelled compared with conventional powertrains. Enhance energy security: a shift to using electricity as a fuel helps to reduce dependence on fossil fuels.
- Help bring together and enhance collaboration among public and private sector stakeholders working on EV deployment.
- Solicit commitments from both government and nongovernment stakeholders for EV deployment – expanded membership to 11 member countries and 29 supporting companies and organisations.

**LEAD GOVERNMENTS**

- Canada
- China

**COORDINATOR**

IEA

www.iea.org/topics/transport/evi/ and www.cleanenergyministerial.org
MISSION
Promote greater deployment of zero- or near-zero emission levels for commercial, medium and heavy-duty vehicles (MHDVs) — including mass global transit — and bring together governments and leading stakeholders to work collaboratively on requirements, policies, and programs that support the electrification of commercial vehicles.

GOALS
• By 2025, near- and zero-emission MHDVs are commercially viable and cost-competitive in first-success applications (also referred to as “beachhead” applications) in target global markets.
• By 2040, zero-emission MHDVs dominate in their segments.
• Gather commitments and pledges from EVI member and non-member governments, stakeholders and industry while encouraging, supporting and informing those that are undecided.
• Entities who take the pledge commit to taking actions that support achieving the aspirational target(s) within the identified timelines and sharing their experience and progress.
• Member and non-member countries would have an opportunity to work directly with CALSTART to build their own domestic Drive to Zero Programs.

LEAD GOVERNMENTS
Canada, China
COORDINATOR
CALSTART

Contact: Secretariat@CEMSecretariat.org
MISSION
To increase momentum on the deployment of CCUS as a viable CO2 mitigation option in a suite of clean energy technologies. It fosters strategic partnerships to accelerate both near and longer-term investment in CCUS and to advance deployment by making CCUS more competitive.

GOALS
- Expand the spectrum of clean energy technologies under CEM to include CCUS.
- Create a platform for governments, the private sector, and investment community to engage and accelerate CCUS deployment.
- Facilitate identification of both near and longer-term investment opportunities.
- Disseminate emerging best practice in CCUS policy, regulatory frameworks and project development.

Contact: Secretariat@CEMSecretariat.org
**MISSION**
A global coalition designed to stimulate global demand for low carbon industrial materials. In collaboration with national governments, IDDI works to standardise carbon assessments, establish ambitious public and private sector procurement targets, incentivise investment into low-carbon product development and design industry guidelines.

**GOALS**
- Encourage governments and private sector to buy low carbon steel and cement: IDDI advocates for governments to set procurement targets for the purchasing of decarbonised steel and cement.
- Source and share data for common standards and targets. Develop key definitions, tools, guidelines and publicly accessible data, enable industry to conduct rigorous reporting and industry benchmarking comparisons, define common methods and understandings of what constitutes decarbonised steel and cement products.

**COORDINATOR**
- UNIDO

**PARTICIPANTS**
- Canada, Germany, United Arab Emirates

**PARTNERS**
- Mission Possible Platform, Steel Zero Campaign, The Climate Group, The Leadership Group for the Industry Transition (LeadIT), IRENA, The World Bank

Contact: Secretariat@CEMSecretariat.org
MISSION

The Green Public Procurement of steel and cement represent very high shares of domestic markets for such materials across most major economies. The Green Public Procurement Campaign is an effort by participating members to drive the global decarbonisation of heavy industries such as steel and concrete by creating a market demand for near-zero carbon concrete and steel through public procurement.

LEAD GOVERNMENTS

Canada, Germany, India, United Kingdom

COORDINATOR

UNIDO

PARTNERS

The Green Public Procurement Campaign brings together a strong coalition of over 60 related initiatives and organizations across the private sector, civil society, intergovernmental organizations, trade associations, and leading experts from academia and think tanks to tackle carbon intensive construction materials such as steel and cement.

These organizations include the Mission Possible Partnership of the World Economic Forum, the Rocky Mountain Institute, the Climate Group, the Leadership Group for the Industry Transition (LeadIT), Building Transparency, and Agora Energiewende.

Launch Event / IDDI's operating agent UNIDO's Press Statement

Contact: Secretariat@CEMSecretariat.org
MISSION
To address urgent global energy challenges and promote the manufacture, purchase, and use of energy-efficient appliances, lighting, equipment and buildings worldwide. The SEAD Initiative fosters information exchange on policies and activities, allowing participants to take advantage of best practices and lessons learned by other countries, and identify opportunities for bilateral and multilateral cooperation.

GOALS
• Increase partner participation and engagement by providing the knowledge and tools needed to help impact standards and labelling, procurement, and incentives policy change
• Highlight the benefits and urgency of energy-efficient equipment and appliance policies among participating governments through technical analysis
• Increase awareness among manufacturers of the value of producing super-efficient appliances and among retailers of the value of stocking such appliances through regional and global awards competitions

LEAD GOVERNMENTS
Argentina, Australia, Brazil, Canada, Chile, China, Colombia, Denmark, Germany, Ghana, Indonesia, Japan, Mexico, Nigeria, Russia, Saudi Arabia, South Africa, South Korea

MISSION

Raise international ambition and advance commercial-scale clean hydrogen and fuel cell-related deployment in the long-term globally, across all sectors. Achieve this via analysis, policies, programs, and projects that would make hydrogen a key enabler in the clean energy transition.

GOALS

- Help ensure successful deployment of hydrogen within current industrial applications.
- Enable deployment of hydrogen technologies in transport (e.g. freight, mass transit, light-rail, marine).
- Explore the role of hydrogen in meeting the energy needs of communities.

Hydrogen Initiative CEM Website
MISSION

The Hydrogen Ports Coalition gathers a global coalition of relevant actors to accelerate the scale-up of clean hydrogen production and demand in ports and coastal industrial clusters.

GOALS

• Raise awareness on the role of ports and coastal industrial clusters
• Share information on clean hydrogen production and demand; bunkering of ships with hydrogen and/or derivates; best practices etc.;
• Policy dialogue, with the aim to share policy challenges, opportunities and recommendations to H2I members, partners and other stakeholders for scaling up clean hydrogen production and demand in ports and coastal industrial clusters.

COALITION MEMBERS (as of 6 August 2021)

Ballard Power Systems, Brunsbüttel Ports, Dock Sud Port, Côtes-d’Armor Chamber of Commerce (Ports of Le Légué, St Quay Portrieux, Erquy), Ennshafen Port, European Sea Ports Organisation (ESPO), Haropa Ports (Le Havre, Rouen, Paris), International Association of Ports and Harbors (IAPH), Free Hanseatic City of Bremen, Fremantle Ports, Flam Port, Hydrogen Council, Neltume Ports, New Energy Coalition, North Queensland Bulk Ports, Pecém Port Complex, Port of Antwerp, Port of Auckland, Port Authority of Valencia, Port of Bahia Blanca, Port of Bécancour, Port of Berlevåg, Port of Bordeaux, Port of Brisbane, Port of Duqm, Port of Farsund, Ports of Finistere, Port of Grenland, Port of Gothenburg, Port of Hamburg, Port of Halifax, Port of Houston, Port of Mejillones, Port of Montreal, Port of Rotterdam Authority, Port of Saguenay, Port of Trois-Rivières, Port of Vienna, Ports Australia, Portuguese Ports Association, Southern Ports, Vancouver Fraser Port Authority, Woodside Energy

**MISSION**
To be an action-oriented mechanism for policy dialogue and collaboration to accelerate development and scale-up of modern sustainable low carbon alternatives to fossil-based solutions in transport, chemicals, plastics and other sectors.

**GOALS**
- Raise the awareness of policymakers about the benefits, opportunities and priorities to scale up sustainable bioenergy worldwide
- Promote international collaboration and dialogue between member countries and their policymakers, industry, academia and other stakeholders
- Identify the main economic and non-economic barriers to modern bioenergy deployment and explore opportunities to overcome these barriers
- Formulate best practices towards effective evaluation, sharing and promotion of sustainable practices for the production of biomass and the entire value chain life cycle
- The initiative helps CEM member countries to realise their sustainable bioenergy potential, thus supporting transitions to a low-carbon energy system (and bioeconomy, more broadly) and contributing to reaching targets under the Paris Agreement.

MISSION
Enable the reduction of GHG emissions and foster a circular economy by showcasing pathways by which countries, companies, and consumers can substitute sustainable bio- and waste-based Fuels, Chemicals, and Materials for their fossil equivalents.

SUBSTITUTION CHALLENGE
To foster ambition and catalyze action, the Biofuture Campaign will develop and implement the Bio-based Substitution Challenge, whose signatories aspire to substitute bio- and waste-based Fuels, Chemicals, and Materials for 10% of their fossil carbon equivalent in relevant sectors and products by 2030, relative to a 2019 baseline.

MISSION
Convene the right people and partners – including those from underrepresented and marginalized voices – to bring forward the novel approaches and diverse perspectives needed to move the needle on achieving a just and equitable transition for a clean energy future.

GOALS
• Share lessons on needed and successful policies that support just clean energy transitions;
• Highlight different policy mixes to support workers and communities with models that meet the unique needs and circumstances of different member countries, industrial sectors and stakeholder communities;
• Advocate for diversity and inclusiveness in HR policies, working conditions and corporate governance; address the needs of youth, gender equality, including pay equity, retention of diverse staff, the promotion of inclusive culture, among other measures that would serve to marshal and develop all available talent to strengthen the global energy sector.

MISSION
Develop energy policies and regulatory frameworks that help mobilise investment and financing to the clean energy sector at scale, particularly from private sources. It aims to create a unique partnership, bringing together energy ministers, other government agencies, private companies, and financial institutions.

GOALS
• Create a forum for peer-to-peer exchange of lessons learned and best practice across the clean energy investment and finance value chain;
• Conduct robust analysis and monitoring that advance understanding of investment and financing trends in clean energy and provide a benchmark for policy development;
• Build and/or disseminate state-of-the-art analytical tools and resources that support policy design, and investment facilitation within and across countries;
• Synthesize international experiences and best practice for creating the enabling conditions to support investment and innovative solutions to stimulate financing;
• Respond to requests from CEM member countries on specific investment-related cooperation. Acting as an agent for country-level engagement, including by “connecting the dots” and brokering support provided by a range of partners for policy design, technical assistance and capacity building.

LEAD GOVERNMENTS

PARTICIPANTS
Brazil, Canada, India, Netherlands, New Zealand, United Kingdom

PARTICIPANTS
MISSION
Promote wider adoption and improved use of energy planning models and scenarios to help countries accelerate their transition to clean energy. Long-term energy scenarios are important tools that can identify options, assess risks, evaluate the roles of different energy technologies in energy systems, and help governments adopt the best policies for a cost-effective and sustainable transition.

GOALS
• Integrating scenarios into decision making: Demonstrating how governments can use energy planning scenarios to ensure better policy making. And exploring how scenarios can be made more relevant to private investors.
• Improving scenarios for the clean energy transition: Examining how long-term energy scenarios can be strengthened to better account for potentially transformational changes to the energy system.
• Identifying capacity building requirements: Analysing where long-term energy scenario development can be improved, and how “best practices” can be shared to enhance institutional scenario planning capacity.

MISSION
Advance gender diversity in clean energy professions, recognizing that the transition to a clean energy future will only succeed if we harness all talent. The Equality In Energy Transitions Initiative is also an IEA Technology Collaboration Programme (TCP).

GOALS
The Equality In Energy Transitions Initiative (formerly C3E Initiative) aims to advance women’s participation in clean energy by creating opportunities and closing the gender gap across four focus areas:

- Awards and recognition
- Gender Data and benchmarking
- Career development/mentorship, including the International Ambassadors Programme
- Dialogue and communications

Contact: Secretariat@CEMSecretariat.org
MISSION
Close the gender gap in the energy sector by encouraging public and private sector organizations to work towards equal pay, equal leadership, and equal opportunities for women in the energy sector by 2030. It seeks to encourage governments, the private sector, and other organizations to sign up to a common set of high-level principles and to showcase how they intend to contribute to the Campaign’s goals.

GOALS
Bring together leadership from across the energy sector to endorse overarching principles that galvanize action, and help all players – from private sector companies to governments at all levels – find common ground for action. Equal by 30 asks companies and governments to endorse principles, then take concrete action to increase the participation of women in the clean energy sector, and close the gender gap.

Equal by 30 Website
MISSION
Provide policymakers with free resources and advisory support on clean energy policies, regulations, and financing mechanisms to help governments reach their clean energy and development objectives quickly and cost-effectively. A source of high-quality clean energy policy and deployment information, providing expert assistance, peer forums, and training, bringing together a network of policymakers to work on clean energy solutions.

GOALS
Serve as a clearinghouse of high-quality clean energy policy and deployment information and to provide in-depth expert assistance, peer forums, and trainings through a virtual platform, bringing a broad network of policy makers together remotely to work on clean energy solutions.

Companies around the world use the ISO 50001 standard to achieve energy, economic, and sustainability benefits that boost competitiveness. The standard offers a business-friendly way to align corporate objectives with national climate and energy goals. To enter, organizations develop a structured case study showing how their energy management system delivers diverse benefits to their company, community, and country. Case studies will be shared online as an inspiration and resource for businesses, governments, and other organizations.

**2021 Award of Excellence Winners are:**
Abastible S.A. (Chile), Dubai Municipality (UAE), JW Marriott Washington D.C. (USA), Kuala Lumpur Golf & Country Club (Malaysia)

The **2022 Energy Management Leadership Awards** are now open! View the [Official Rules](#).

The 8th Award Nomination is open. Learn more at:
1. Advanced Cooling Challenge (ACC) Campaign (see Website)
2. Advanced Power Plant Flexibility (see Website)
3. Corporate Procurement Of Renewable Energy Sources (see Website)
4. Distributed Generation in Strategic Regions Campaign (see Website)
5. Energy Management Campaign (see Website)
6. Energy Management Working Group (see Website)
7. Global Lighting and Energy Access Partnership (LEAP) (see Website)
8. Global Lighting Campaign (see Website)
9. Multilateral Solar and Wind Working Group (see Website)
10. Nearly Zero Energy Buildings (see Website)
11. Sustainable Cities and Eco-Energy Towns (see Website)
H.E. Michal Kurtyka,
Minister of Climate and Environment, Poland
“We are fully committed to the CEM and its mission to accelerate clean energy transitions. We are proud to participate in the Nuclear initiative for two years. We are pleased to announce that we have joined the Electric Vehicles Initiative.”

H.E. Andreas Feicht, State Secretary, Federal Ministry for Economic Affairs and Energy, Germany
“I am very pleased to be part of this global energy community with its diverse membership of countries that jointly account for the vast majority of global energy production and use. CEM is the right place to address these issues, given the urgency of the challenges we face and the scale of our ambitions. We need effective international cooperation and collaboration more than ever.”

H.E. Angus Taylor, Minister for Industry, Energy and Emissions Reduction, Australia
“Our ambition is to produce the cheapest clean hydrogen in the world at under $2 Australian Dollar. That is why we will continue to work with the CEM Hydrogen Initiative as a key part of realizing this goal.”

H.E. H.E. Li Yong, Director General, United Nations Industrial Development Organization
“UNIDO is proud to join forces with member countries of the CEM and the broad CEM community to launch the new IDDI under the co-leadership of India and the UK. The initiative will occupy a unique spot in the global arena – it will leverage the political will to take actions, and generate the knowledge and tools needed to make a step-change towards industrial decarbonisation”

H.E. John Kerry,
US Special Presidential Envoy for Climate, USA
“I am excited to kick off the launch of CEM 3.0 and MI 2.0 this week. They will be critical as we accelerate net zero. Limiting global warming to 1.5 degrees Celsius will be difficult, but international collaboration through the CEM Secretariat will help drive progress.”

H.E. Michael Bloomberg, UN Special Envoy for Climate Ambition and Solutions. Founder and CEO of Bloomberg L.P
“The work CEM does is critical to driving the global transition to clean energy. That is why so many of the world’s major economies are represented here. CEM has an opportunity to advance the fight against climate change while at the same time spurring economic growth and innovation.”

H.E. Kiyoshi Ejima, State Minister of Economy, Trade and Industry, Japan
“Japan believes that the CEM will continue to play an important role towards the global promotion and diffusion of clean energy.”
