Webinar #2:

Driving Prosperity in SEA with Demand-driven Clean Energy Skills Development

12 March 2026, 14:00 (GMT+7/BKK/JKT) / 15:00 (GMT+8/SGP/Manila)/08:00 am (CET)

New labor market analysis data and tools are helping guide reskilling and other workforce development efforts in SEA, but coordination and capacity building are needed to align stakeholders and put policy into practice. Expert panelists and webinar participants will share examples of data and demand-driven reskilling efforts that are successfully removing barriers for women and youth, and supporting the reskilling of traditional fuel sector workers as energy production is decarbonised.

Agenda

2 min	**Opening**
	● **Moderator**
3 min	**Welcome from CEM EPI**
	● **CEM Secretariat**
45 min	**Perspectives from Southeast Asia and global partners**
	● Context for discussions: Re-cap of December proceedings; detail on how data on occupational and skills mapping should inform skills development efforts
	● **Expert panelists with interventions on these topics:**
	○ Leveraging labor market demand and skills needs data to design effective reskilling and upskilling programs; including new tools available for labour market information
	○ Effective programs for reskilling and upskilling, including but not limited to: (1) transitioning fossil fuel workers; (2) women; and (3) youth and informal workers.
	○ Speakers to include the Philippines, India and the IEA
35 min	**Toolkit for policymakers**
	● Presentation on the draft Framework for Toolkit
	● Feedback and questions from the floor
	● Interactive Polls, followed by Family Photo
5 min	**Closing Remarks & Next Steps**
	● **TARA Climate Foundation (TBC)**
