

Webinar #3:

Turning Policy into Practice: Building a Just Transition Ecosystem in Southeast Asia

21 May 2026, 14:00 (GMT+7/BKK/JKT) / 15:00 (GMT+8/SGP/Manila)/09:00 am (CEST)

A coordinated approach to developing effective ‘ecosystems’ is the key to just transitions to the clean energy economy. Organization and partnerships at the community, national, and regional levels are needed in Southeast Asia to ensure upskilling and reskilling efforts are aligned with market needs and other trends, and that everyone has access to opportunities. We will showcase solutions from across Southeast Asia and globally in the areas of:

- 1) Cross-ministry collaborations
- 2) Working with TVETs and academia on green skilling
- 3) Engaging industry and employers
- 4) Leveraging regional partnerships
- 5) Fostering equity and quality pathways

The webinar will include a special preview of the upcoming Toolkit, “*Enhancing Livelihoods and Creating Workforce Readiness for Clean Energy and Sustainable Transformations in Southeast Asia*,” to be published at 17th Clean Energy Ministerial in October 2026.

Agenda

3 min	Opening <ul style="list-style-type: none">● Moderator
7 min	Welcome from CEM EPI <ul style="list-style-type: none">● CEM Secretariat
20 min	Presentation on the Toolkit: <i>Enhancing Livelihoods and Creating Workforce Readiness for Clean Energy and Sustainable Transformations in Southeast Asia</i> <p>Participants will receive a special preview and opportunity to weigh in on the Toolkit for Governments and their partners, which will include:</p> <ul style="list-style-type: none">● Background and key trends influencing clean energy skills development● Recommendations for governments and their partners● Recommendations in action: examples of successful programs in SEA and globally● Curated listing of tools and resources to support action
55	Expert panelists with interventions on these topics: <ul style="list-style-type: none">○ Their feedback on the toolkit○ What is needed to build skills and capacity in SEA through cross-sectoral, public/private, and regional partnerships?○ How can SEA governments (multinational, national and sub-national) partner with other stakeholders to create clean energy education, including embedding RE and other clean energy training in existing academic and TVET pathways?
5 min	Closing Remarks <ul style="list-style-type: none">● TARA Climate Foundation (TBC)
