#### Event Description:

This side event will launch an exciting new initiative on nuclear energy under the Clean Energy Ministerial. It will feature a multilateral, cross-sectoral discussion of the roles that advanced nuclear energy can play alongside other clean energy sources. The discussion will address power system integration and transformations, such as through nuclear-renewable systems. It will also explore opportunities for nuclear energy technologies to reduce emissions and air pollution from the power generation, industry, and end-use sectors.

#### Highlights:

- ✓ Opening remarks by leading countries (Canada, Japan, United States)
- ✓ Perspectives from emerging and embarking countries joining the initiative (invited)
- ✓ Industry, expert, and civil society perspectives on the roles that nuclear energy can play in facilitating energy integration and clean energy, with closing remarks by multilateral organizations
- ✓ An engaging visual display on innovative and integrated clean energy systems and uses

#### Key speakers include:

- ✓ Dr. Fatih Birol, Executive Director, International Energy Agency
- ✓ Mr. William D. Magwood IV, Director-General, Nuclear Energy Association
- ✓ Ms. Agneta Rising, Director General, World Nuclear Association; co-founder, Women in Nuclear Global
- ✓ Mr. Joshua Freed, Vice President of Clean Energy, Third Way
- ✓ Mr. Rich Powell, Executive Director of ClearPath Foundation
- ✓ Dr. Shannon Bragg-Sitton, Idaho National Laboratories
- ✓ Dr. Mark Lesinski, Canadian Nuclear Laboratories
