

Accelerating the Adoption of Distributed Generation in Strategic Regions

This campaign is launched by 21st Century Power Partnership (21CPP). It is also associated with International Smart Grid Action Network (ISGAN), Clean Energy Solutions Center (Solutions Center), Electric Vehicles Initiative (EVI)

This campaign is expected to last 12 months.

Goals

The goal of this campaign is to accelerate the adoption of clean distributed generation (DG) technologies among CEM Members and targeted regions.

The campaign would focus on fostering peer-to-peer exchange and sharing best practices on how to accelerate DG deployment with special emphasis on renewable energy technologies by utilizing the latest technical, policy and regulatory solutions.

Lead CEM Member(s)

Mexico

Participating CEM Member(s)

Chile, Brazil, Denmark, Germany. Consultations with other CEM Members and non-CEM Members (e.g. Argentina) are ongoing.

Operating Agent(s)

U.S. National Renewable Energy Laboratory (NREL)

Main Contact Point for participating in the campaign

Efrain Villanueva, *Director*, Clean Energy, SENER,
evillanueva@energia.gob.mx

Doug Arent, *Deputy Associate Lab Director*, National Renewable Energy Laboratory (NREL), Doug.Arent@nrel.gov
