

# Bureau of the Minister Delegate to the Prime Minister, in Charge of Energy Security

## Towards Energy Access in Haiti

René Jean-Jumeau Ph.D.  
Minister

# Agenda

- Conventional Approach
- Innovative Approach
- Public lighting
- Domestic lighting
- A New Model

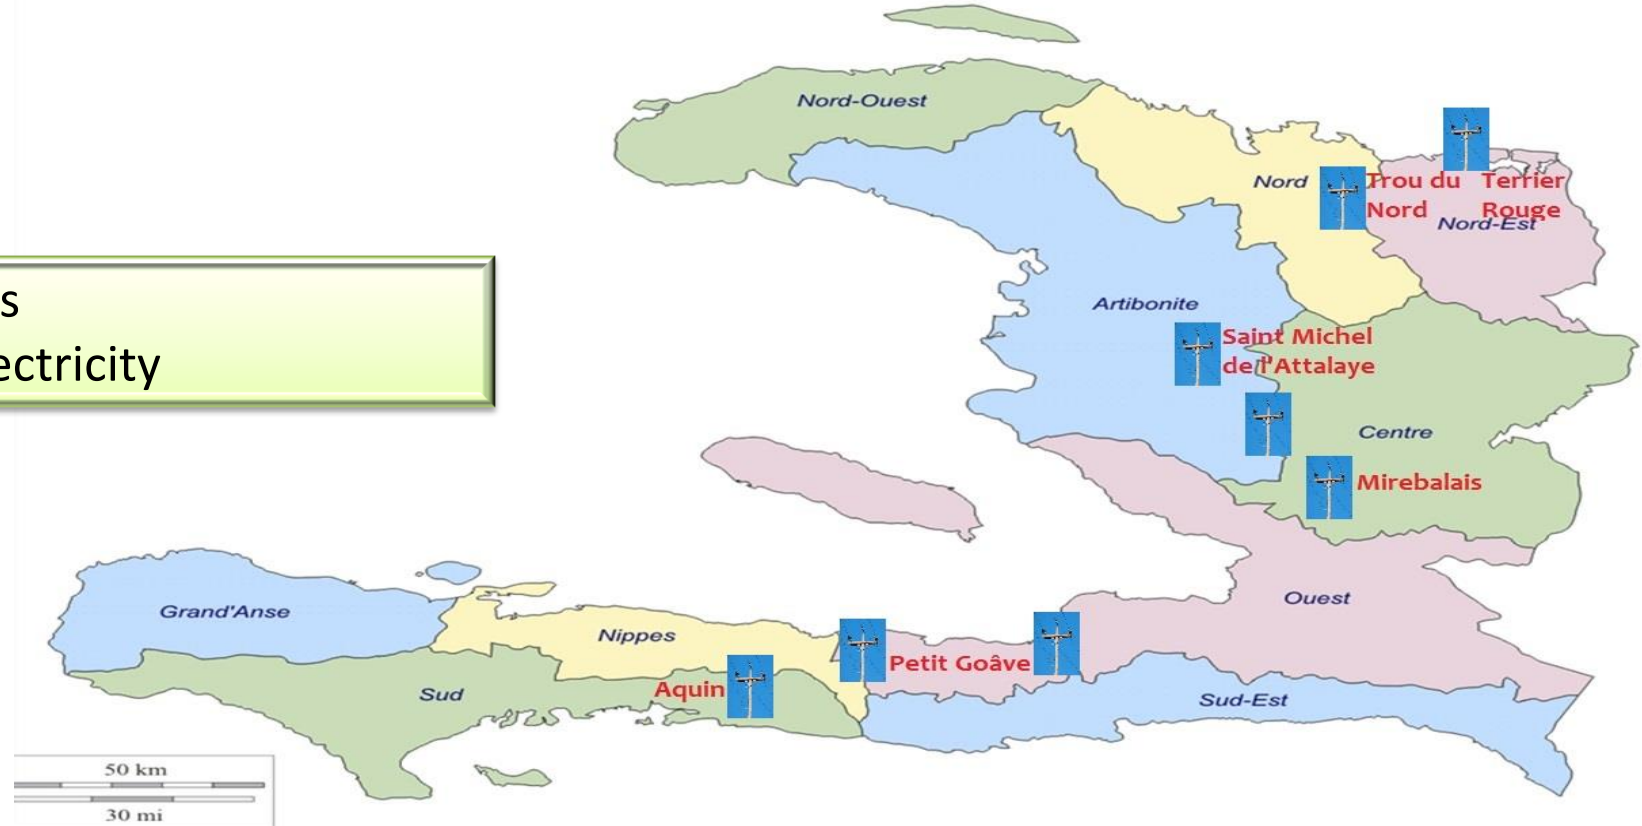

# Conventional Approach

Grid extension in three regions of the country: South (Grand Sud), Centre, Northeast (Nord-Est)

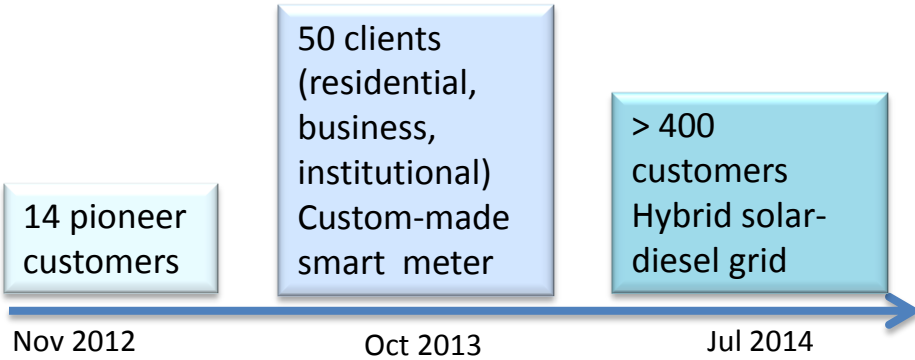

8,500 new customers  
Up to 12 hours of electricity

# Innovative Approach

## Microgrid (non-grid connected)

**Haiti Rural Electric Cooperative**

- Hybrid solar-diesel to power 3 cities in the South coast

# Innovative Approach

## Biomass power generation

Partnership agreement with the private firm "Haïti Solidarité SA" (HSSA) to grow "vetiver" in erosion control protection strips and to use it as raw material for cooking and electrification via gasification.

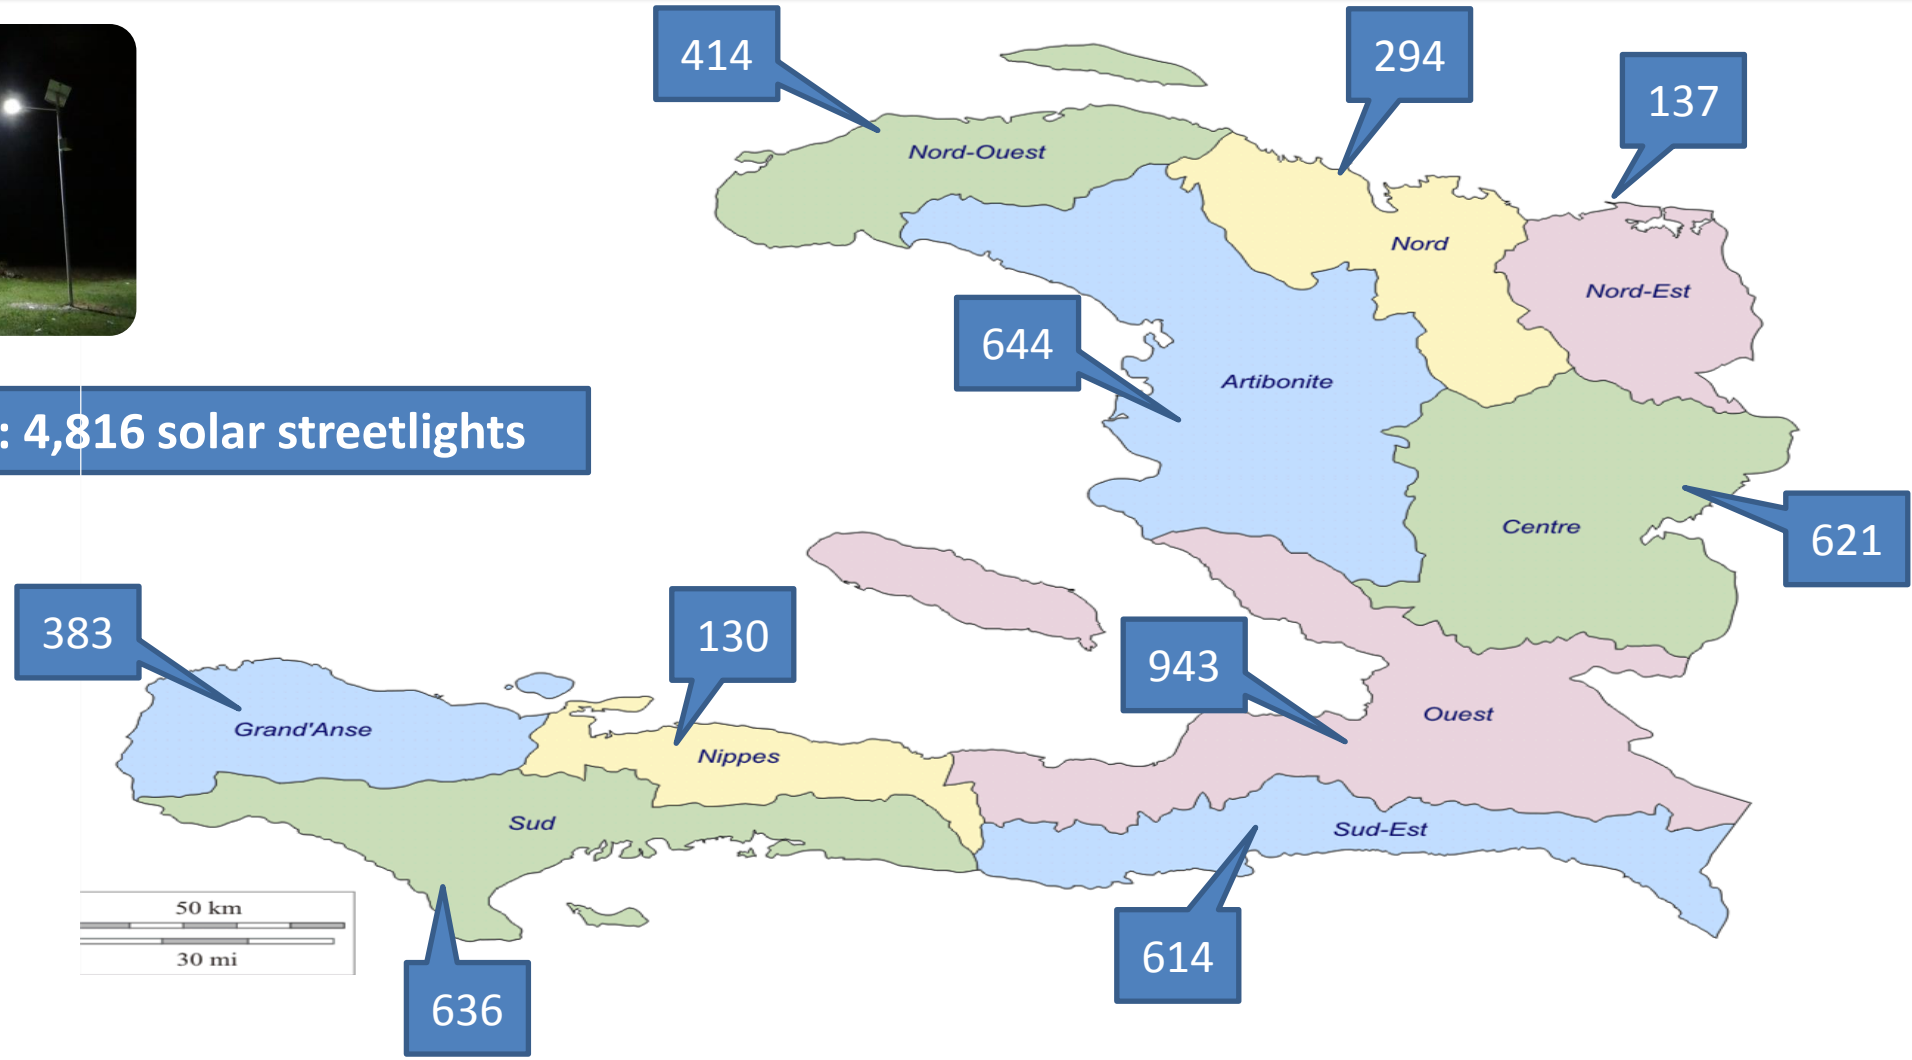

Development of a generator burning agricultural waste in partnership with the private institution "Limyè Pa m".

# Public Lighting

Limyè PèP : 4,816 solar streetlights

Public Private Partnership : 1,050 solar streetlights

# Domestic Lighting

Boost private providers to foster the market

*micama* **Soley**

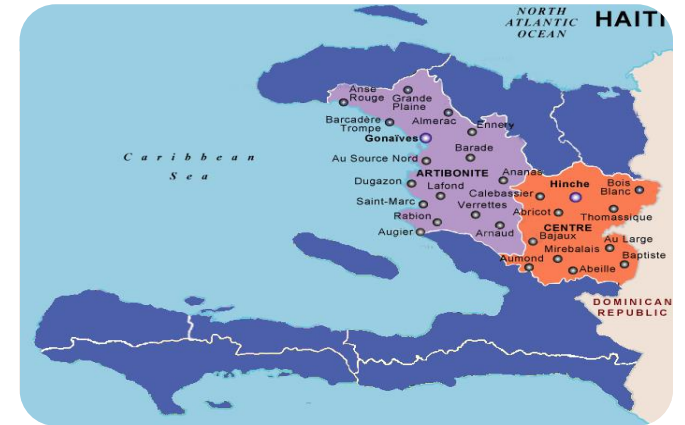

**GREEN ENERGY**

# A New Approach

Northern

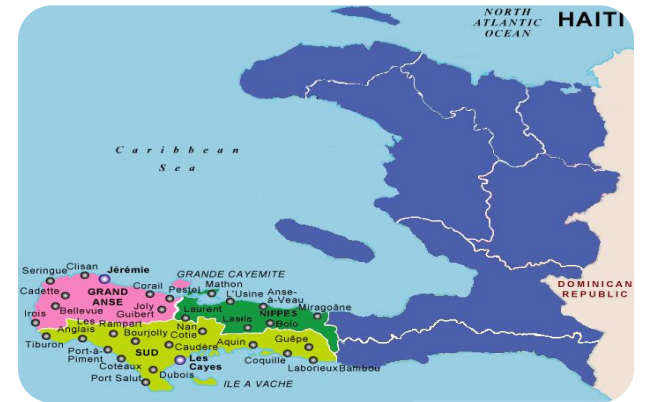

Central

Split the country into 4 regions  
RFP to be released soon

Western

Southern

# Thank you!
